Our Brands

HOW TO USE BOPP TAPES?

Tape comes off from laminated, wet or muddy boxes

Press the tape firmly after fixing it to ensure that it stays in place.

Apply the tape in an 'I' shape instead of '+' shape so that it stays firm

For better results, use a tape dispenser

Using a hot tape or hot box or even if they are kept in a hot place, reduces its gumming capacity resulting in improper fixing

Use a tape of appropriate width depending on the size of the box

Box should be filled to its correct capacity. Tapes will not stay in place on half filled boxes

Tapes will not stay in place even on over-filled boxes.

While fixing, keep an extra 2.5-3 inches of tape on the sides

Use a tape of suitable micron based on the thickness of the box

Check out for our new brand!

SELF ADHESIVE TAPES

To bring more transparency in BOPP tape market of ir-regulators (meter & micron) we proudly present you futures most trusted brand in Indian BOPP tape industry " seal pack Premium".
